DOES INSTITUTIONAL GROUNDWATER MANAGEMENT WORK?

Is groundwater management working? The *Kansas Journal of Law & Public Policy* annual symposium attempts to answer this pressing question.

The morning sessions survey the policy challenges presented by the various legal regimes of groundwater management both in the United States and internationally.

The afternoon sessions focus on the perspectives and the respective roles of the various actors within Kansas's groundwater management regime: the state itself, water lawyers and their clients, and the managers of groundwater management districts.

The 2006 Symposium promises to provide a current evaluation of the state of groundwater management in Kansas, and as such is of particular interest to lawyers and policy-makers. The *Journal* has applied for 6 units of CLE credit, for both Kansas and Missouri.

Papers presented at this symposium will be published in the *Kansas Journal of Law and Public Policy*, Volume XV, No.3, May/June, 2006. Copies of this issue may be ordered on the day of the symposium, or by contacting:

Demetra O. Salisbury
Symposium Editor
